

## THE GARDEN OF HAPPENESS

The garden was first planted by the Separatists in 1828. It was laid out in a special geometric design to represent the way to the Kingdom of God. The design represents the "New Jerusalem" described in the 21st chapter of the Book of Revelation. The most important purpose of the garden was to sow spiritual seeds and to harvest the many spiritual fruits that are mentioned in the Bible.

In the center is a large Norway spruce which represents the Tree of Eternal Life or Kingdom of God. The area surrounding it represents heaven. The Juniper trees at the head of each of the Centrum beds symbolize the twelve apostles and the tribes of Israel.

The wide walk around the entire outer edge of the garden depicts the secular world. There are twelve straight and narrow paths that represent the different walks of life that lead to the center tree of Everlasting Life. God's redeeming love is also shown in that if one strays onto a cross path, they may at the next intersection return to one of the straight and narrow paths that leads to Eternal Life.

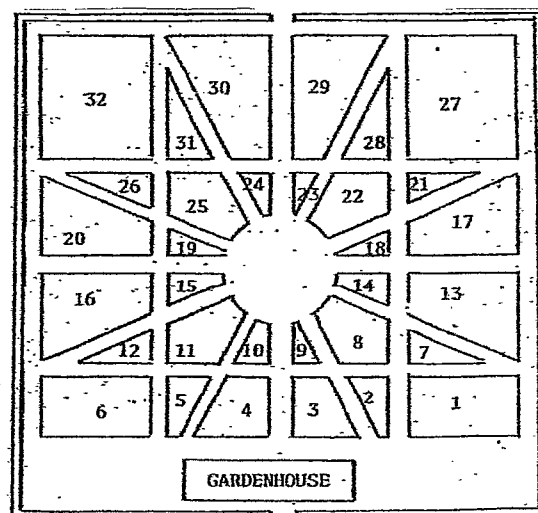

The Separatists had a keen focus on getting to Heaven and were always helping others to find their way.

The Zoar Garden

## ZOAR GARDEN PLANTS – 2017
